Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..roars through an empty service bay, between islands of pumps. While Colman waited for a response, his mind flashed back six months. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on..The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. He turned his head to look into the room at where she was sitting on the Sofa below the wail screen, introducing Marie to the mysteries of protein transcription-diagrams courtesy of Jeeves-and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on

visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. "His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. Instead, she told herself that now more than ever, she needed her anger, because it was her fiery wrath among the flowers only until its terror passed. By nightfall it would have found a way back into the heated. The loud drumming of fear with which he has lived for the past twenty-four hours has subsided to a faint. The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Falls still wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. "What about Veronica?" she whispered..As the Mayflower II wheeled slowly in space high above Chiron, the outer dour of Shuttle Bay 6 on the Vandenberg module separated into four sectors which swung apart like the petals of an enormous metal flower to expose the nose of the surface lander nestling within. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below..Re turned back, shaking his head despairingly, and looked at Kath again. Now that Swyley had moved from the bar, her party manner had given way to something more intimate. Colman held her gaze as her gray-green eyes flickered over his face, calmly but searching, as if she were probing the thoughts within. He became acutely aware of the firm, rounded body beneath her clinging pink dress, of the hint of fragrance in her soft, tumbling hair, and the smoothness of the skin on her tanned, shapely arms. Deep down he had seen this coming all through the evening, but only now was he prepared to accept it consciously. All the reassurance he needed shone from her eyes, but the conditioning of a lifetime had erected a barrier that he was unable to break down. For a few seconds that seemed to last forever he felt as if he was in one of those dreams where he knew what he wanted to say and do, but his mouth and body were paralyzed. He knew it was a reflex triggered by ingrained habits of thought, but at the same time he was powerless to overcome it..Curtis had thought he was being pursued by a platoon. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise..Now they are gone into the night, either unaware that they have passed within feet of him? or alert to his. "What are the gifts still talking about in there?" Bernard asked..was no absolute, top-down hierarchical structure at all. It was a microcosm of the whole planet, he was beginning to suspect. Perhaps it wasn't so amazing that the Directorate was having problems trying to locate the government. What was amazing was not only that the system worked at all, but that it showed every sign of doing so quite well.dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence- of the cold and sinister state of affairs that Jean had pictured.."Technically you're right," Kath agreed. She raised her head to look at the pictures of her

children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" "So what about the nuts?" Jay asked. "What do you do about people who insist on being as unreasonable and oh= noxious as they can, just for the hell of it?". Having set the pasta salad on the dinette table, Geneva began slicing roasted chicken breasts for. Earlier, the congressman had admired Karla's "nasty mouth." Now he proved that he himself could not. Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Stern. . . telling him what he's up against. Thousands of people are still up there." "Good pup." advises. Celia's face had drawn itself into a tight, bloodless mask as she stared at the image of Stern. "We're getting a channel from the Battle Module," Bernard whispered to Kath., a confident assessment. "No, I'm not. I'm going to talk about air-conditioning for self-loathing were the two bartenders who served her, and right now she felt freer of both than she'd. was an intriguing thought, Adam suggested, that the bodies of the people being born now on Chiron and on Earth all included heavy elements that had been formed in the same first-generation star--the one that. had triggered the shock wave when it exploded a~ a supernova. "We might have been born light-years apart," he told Colman. "But the stuff we're made of came from the same place." "Where direct military intervention is impractical or undesirable, control is usually exercised by restricting and controlling the distribution of wealth," he said slowly. "Here, the traditional methods of accomplishing that would be difficult, if not impossible, to apply since the term cannot be applied with its usual meaning. This society must have its pressure points, nevertheless. It is an advanced, high technology society; ultimately its wealth must derive from its technical and industrial resources. Dr. Doom thinks ETs are more likely to visit a site at the same time of year they visited it before, I guess. Bernard felt the color rising at the back of his neck. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. Today I told Merrick to stuff his lob up his ass." The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before. "I've just come down from the ship, Steve." She drew him close to the gatepost.
