Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..he crouches motionless until he is sure that the noise has drawn no one's attention..out of Eden." A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." .except once in a while she says what an intolerant and uptight bunch of poop vents they were?though,."Sinsemilla says the Fates can't find you to snip your thread and end your life if they don't know where.Stanislaw slipped the compad into his pocket. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been..The Battle Module was a mile-long concentration of megadeath and mass destruction that sat on a base formed by the blunt nose of the Spindle, straddled by two pillars that extended forward to support the ramscoop cone and its field generators, and which contained the ducts to carry back to the midships processing reactors the hydrogen force-fed out of space when the ship was - at ramspeed. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice." .What in hell's come over him?" Hanlon asked, nonplussed. thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant..Adam threw up his hands again. "The kids won't let me! They say it wouldn't be the same any other way. What can you do?'.Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all?."It was one of our people," the major said..ever-dwindling but not yet eradicated capacity for romanticism.
