that though all the genes are there in every cell of your body, they aren't all working alike. The cell is an intricate assemblage of chemical reactions, chemical building blocks, chemical products, and physical structures, all of which influence one another. Some genes are inhibited and some are stimulated, in a variety of ways depending on subtle factors, with the result that different cells in your body have genetic equipment in which only characteristic parts are working at characteristic rates..When the blowout started, Lang had snapped on her helmet quickly. Then she had struggled against the blizzard and the undulating dome bottom, heading for the roofless framework where the other members of the expedition were sleeping. The blowout was over in ten seconds, and she then had the problem of coping with, the collapsing roof, which promptly buried her in folds of clear plastic.
