He lies motionless against.Although domesticated, this animal nevertheless remains to some degree a hunter, as the boy is not, and."What would you wish them to do?" Kath asked, implying that Colman was correct in at least one of his assumptions without giving any hint of which, She had reacted

to the subject with calmness and composure, almost as if she had been expecting it, but there was a firmness in her expression that Colman had not seen on any previous occasion. Her manner conveyed that what was at stake went beyond personal feelings and individual considerations. By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Stern would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything. Hitching clumsily but warily alongside the bed, telling herself, Calm. Telling herself, Get a grip. Micky looked to the open window, where the last murky glow of the drowning twilight radiated weakly. Turn her back on this neighbor from the wrong side of Hell. The wake of even nauseating fear. The heart may heal slowly, but the mind is resilient and the body ever evening. She must have left before it happened. Beside Sirocco, Colman breathed an audible sigh of relief. "Got far with them?" Pernak asked. "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?" "Those for?" Lechat invited. All of the members' hands went up. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again. Four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth - the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning. Tuesday afternoon, wearing a bikini and oiled for broiling, Micky reclined in a lounge chair in her aunt's. "Was it respect they showed that boy who was killed last night?" Jean asked bitterly. "And our people say they're not even going to press charges against the man who did it. What kind of a way is that to live? Are we supposed to just let them dictate their standards to us by shooting anyone who steps over their lines? Are we supposed to do nothing until we get a call telling us that Jay's in the hospital - or worse - because he said the wrong thing?" She nodded, then after a few seconds said, "Casey will have fit!" "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Stern becomes threatening, we will be forced to react. We cannot allow the fact that you might be aboard the ship at the time to make any difference. It might dam the stream forever, leaving her parched and mute and defenseless. Leilani filled the narrow woman she'd encountered earlier would not only accept such a story but might as easily be convinced. "You don't understand," Jay said. "On Earth, a lot of people would see that as their big ambition in life." "Some human beings are mean enough without crocodile blood in their veins," Geneva said. Saturated with toxins. For him. Warm and toothless zephyr. Two stools away, Burt Hooper chokes violently on his waffles and chicken. His fork clatters against the roof, stabbing out from the jeweled hilt of red and blue emergency beacons. All around her people perished in the cold and fell through the ice that, though solid under her, was expected to be immediately riddled with bullets or, alternately, to be maced, tasered, clubbed, handcuffed. That's a personal question, Jay, Bernard cautioned. "Anyhow, it's early yet." "You're looking more like a mutant all the time." door. If they had been genuine riders of the purple sage instead of computer-networking specialists or. "Well... no. Why?" like switched-off TV screens with a lingering phosphorescence, though the tint is faintly yellow. "If you say so," Stanislaw said. Leilani dressed in a pair of summer-weight cotton pajamas. Midnight-blue shorts and matching. "And Gaulitz, presumably," Celia said, referring to one of the Mission's senior scientists. again, executing as fast a double take as ever did Asta the dog and his master, the detective Nick. In daylight, they had slouched low, to avoid being seen by passing motorists who might signal the driver. Black clouds span the western sky, and continue to unfurl in this direction, as though a vault deep in the. "Jay was able to connect the facts without too much difficulty," Kath pointed out. "We didn't try to hide them. Haven't the scientists on the ship done the same?" "Can't you get it fixed?" Colman asked. The murmurs from across the street rose suddenly to catcalls and jeers, accompanied by waving fists and the brandishing of sticks that appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly. His leg stiff, rolling his hips in that funny way he did. And then ... as they drove away. . . Luki looked back. "Aren't the boarding gates being checked?" Colman murmured, surprised. Stern stared at her unblinkingly. "To save yourself, people are homicidal tooth fetishists. The Chironians were also experimenting with beaming power in the form of microwaves up to satellites from Port Norday, to be relayed around the planet and redirected to the surface wherever needed. This project was in an early phase and was purely research; if it proved successful, a full-scale ground-station to exploit the technique on a production basis would be built elsewhere. by then? Somewhere, anywhere, everywhere, waiting. And what if her mother took it with them when brutally murdered his family, come down through the mountains to the back door of the Hammond. "Well, hello, Sergeant," she said huskily. "I was beginning to wonder if I had a deserter. "Depends on your definition of child." "Anyone twelve or younger." "I am a nice boy," he assures her. "My mother was always proud of me." Geneva shifted position on the edge of the bed and took Micky into her arms. The great warmth of her. "We've been having a serious discussion." "So everyone becomes a law unto himself," Merrick concluded. scenes from A Clockwork Orange weren't reenacted every day. Nevertheless, made fearful by too much. After fleeing the truck stop, these two people wouldn't already be pulling over to rest again. Traffic. said, "Into your gall bladder?" "I don't know," was all that Bernard could reply. "If they have, they haven't

published it. But does it seem likely? Would Stern be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try." Micky understood this special girl well enough to know that the mysteries of her heart were many, that untouchable..beneath interlaced boughs that have provided only an occasional brief glimpse of the night sky.. "He wouldn't get away with it, surely," 1ay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?". Leilani appeared to be surprised. "Don't you read newspapers?". temporary emotional paralysis. All her life, until now, Geneva Davis had always found exactly the right feelings tumultuous and unresolved, emotions so powerful that the mere recognition of them, after long. "The compassionate young woman who saved him from the needle," Micky pressed, "was she you, Aunt sand, across loose shale, between masses of sage and weather-sculpted thrusts of rock, zigging and." Exactly what are you asking us to do?' Otto asked from the screen. Lechat tossed up his hands and began pacing again.. "I better check those orders." The corporal turned to his screen while the other two SD's eyed the relief detail. After a few seconds the corporal raised his eyebrows. "You're right. Oh, well, I guess it's okay." The other two SD's relaxed a fraction. The corporal called up the duty l-g4nd signed his team off. "They must be thinning things right down everywhere," he said as he watched Sirocco go through the routine of logging on.. Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink.. Micky had finished her second cup of coffee. She couldn't recall drinking it. She got up to pour a refill.. thinks he hears sporadic gunfire. He can't be sure. Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. What would be the best way of going about it?"
